$$
\begin{aligned}
&2\,\mathrm{Bgtan}\,\frac{1}{2} - \mathrm{Bgtan}\,\frac{1}{7} \\
&= \mathrm{Bgtan}\left(\frac{2\cdot\frac{1}{2}}{1-\left(\frac{1}{2}\right)^2}\right) - \mathrm{Bgtan}\,\frac{1}{7} \\
&= \mathrm{Bgtan}\left(\frac{4}{3}\right) - \mathrm{Bgtan}\left(\frac{1}{7}\right) \\
&= \mathrm{Bgtan}\left(\frac{\frac{4}{3}-\frac{1}{7}}{1+\frac{4}{3}\cdot\frac{1}{7}}\right) \\
&= \mathrm{Bgtan}\left(\frac{\frac{25}{21}}{\frac{25}{21}}\right) \\
&= \mathrm{Bgtan}(1) \\
&= \frac{\pi}{4}
\end{aligned}
$$
