$$\begin{aligned}
&\int \ln^2 x dx \\
&= x\ln^2 x - \int x d\left(\ln^2 x\right) = x\ln^2 x - \int x \cdot 2\ln x \cdot \frac{1}{x} dx \\
&= x\ln^2 x - 2\int \ln x dx = x\ln^2 x - 2x\ln x + 2\int x d\left(\ln x\right) \\
&= x\ln^2 x - 2x\ln x + 2x + c = x\left(\ln^2 x - 2\ln x + 2\right) + c
\end{aligned}$$
