$$\lim_{(x,y) \rightarrow (0,0)} \frac{\sin(x^2 + y^2)}{x^2 + y^2}$$

$$\text{Stel } t = x^2 + y^2$$

$$(x, y) \rightarrow (0, 0) \Rightarrow t \rightarrow 0$$

$$= \lim_{t \rightarrow 0} \frac{\sin(t)}{t}$$

$$= 1 \text{ (standaardlimiet)}$$
