Oefeningenreeks 1B nr. 14.20

$$\begin{aligned} & \frac{1+3i}{3-i} \\ &= \frac{(1+3i)(3+i)}{(3-i)(3+i)} \\ &= \frac{3+i+9i+3i^2}{9-i^2} \\ &= \frac{3+10i-3}{9+1} \\ &= \frac{10i}{10} \\ &= i \end{aligned}$$
