Oefeningenreeks 1B nr. 20.3

$$\frac{(2+i)^2}{4-i} = \frac{4+4i-1}{4-i} = \frac{3+4i}{4-i} = \frac{(3+4i)(4+i)}{(4-i)(4+i)} = \frac{8+19i}{17} = \frac{8}{17} + \frac{19i}{17}$$
