$$5z^2 = 6z - 2$$

$$5z^2 - 6z + 2 = 0$$

$$D = 36 - 4 \cdot 5 \cdot 2 = -4 = (\pm 2i)^2$$

$$\Rightarrow z_1 = \frac{6 + 2i}{10} = \frac{3 + i}{5}$$

$$\Rightarrow z_2 = \frac{6 - 2i}{10} = \frac{3 - i}{5}$$
