$$4(z+1)^2 - z = 0$$

$$4z^2 + 8z + 4 - z = 0$$

$$4z^2 + 7z + 4 = 0$$

$$D = 49 - 16 \cdot 4 = -15 \Rightarrow d = \pm\sqrt{15}i$$

$$z_1 = \frac{-7 + \sqrt{15}i}{8} \text{ en } z_2 = \frac{-7 - \sqrt{15}i}{8}$$
