$$-\sqrt{3} + i$$

$$r = \sqrt{(-\sqrt{3})^2 + 1^2} = 2$$

$$\alpha = \text{Bgtan}\left(-\frac{1}{\sqrt{3}}\right) = \pi - \frac{\pi}{6} = \frac{5\pi}{6}$$

$$z = 2 \text{cis}\left(\frac{5\pi}{6}\right)$$
