 Oefeningenreeks 1D nr. 10.7

$$\frac{2i \left| \begin{array}{cc|c} i & i+3 & -2 \\ & -2 & -2+2i \end{array} \right|}{\left| \begin{array}{cc|c} i & i+1 & -4+2i \end{array} \right|}$$

$$(iz^2 + (i+3)z - 2) = (iz + (i+1))(z - 2i) + (-4 + 2i)$$
