$$a(z^2 + 1) + b(z + i) + c(iz^2 + 2z) = 3i$$

$$az^2 + a + bz + bi + icz^2 + 2cz$$

$$(a + ic)z^2 + (b + 2c)z + (a + bi)$$

$$a = -c$$

$$b = -2c$$

$$-ic + (-2c)i = 3i \Rightarrow c = -1$$

$$a = -i(-1)$$

$$b = -2(-1)$$

Antwoord:

$$a = i$$

$$b = 2$$

$$c = -1$$
