$$\begin{aligned}\operatorname{Bgtan} \frac{1}{2} &= \operatorname{Bgtan} \frac{1}{3} + \operatorname{Bgtan} \frac{1}{7} \\ &= \operatorname{Bgtan} \left( \frac{\frac{1}{3} + \frac{1}{7}}{1 - \frac{1}{3} \cdot \frac{1}{7}} \right) \\ &= \operatorname{Bgtan} \left( \frac{\frac{10}{21}}{\frac{20}{21}} \right) \\ &= \operatorname{Bgtan} \left( \frac{1}{2} \right)\end{aligned}$$
