$$\log_3 2 \log_{\sqrt{2}} x + \log_3(3 - x) = \log_{\sqrt{3}} 2$$

$$\Leftrightarrow \log_3(2 \log_{\sqrt{2}} x(3 - x)) = \log_3 4$$

$$\Leftrightarrow \log_{\sqrt{2}} x(3 - x) = 2$$

$$\Leftrightarrow (3 - x) \log_2 x = 1$$

$$\Leftrightarrow (3 - 2) \log_2 2 = 1$$

$$\Leftrightarrow x = 2$$
