$$\text{Opgave: } 3^{2x^2+1} = 3^{x^2+5x-5}$$

$$\Leftrightarrow \log_3 3^{2x^2+1} = \log_3 3^{x^2+5x-5}$$

$$\Leftrightarrow 2x^2 + 1 = x^2 + 5x - 5$$

$$\Leftrightarrow x^2 - 5x + 6 = 0$$

$$\Leftrightarrow (x - 3)(x - 2) = 0$$

$$\Leftrightarrow x = 3 \vee x = 2$$
