Bewijs dat:

$$\coth^2 x - \operatorname{csch}^2 x = 1$$

Uitgeschreven in termen van  $\sinh$  en  $\cosh$ :

$$\begin{aligned}\coth x &= \frac{\cosh x}{\sinh x}, & \operatorname{csch} x &= \frac{1}{\sinh x} \\ \Rightarrow \coth^2 x &= \frac{\cosh^2 x}{\sinh^2 x}, & \operatorname{csch}^2 x &= \frac{1}{\sinh^2 x} \\ \Rightarrow \coth^2 x - \operatorname{csch}^2 x &= \frac{\cosh^2 x - 1}{\sinh^2 x}\end{aligned}$$

Gebruik de identiteit  $\cosh^2 x - \sinh^2 x = 1 \Rightarrow \cosh^2 x - 1 = \sinh^2 x$ :

$$\begin{aligned}&= \frac{\sinh^2 x}{\sinh^2 x} = 1 \\ \Rightarrow \coth^2 x - \operatorname{csch}^2 x &= 1\end{aligned}$$
