Bereken de afgeleide functie van: $f(x) = \sqrt{1-x^2} \cdot \text{Bgsin}(x)$

$$\begin{aligned} f'(x) &= \sqrt{1-x^2} \cdot \frac{d}{dx}(\text{Bgsin}(x)) + \text{Bgsin}(x) \cdot \frac{d}{dx}(\sqrt{1-x^2}) \\ &= \sqrt{1-x^2} \cdot \frac{1}{\sqrt{1-x^2}} + \text{Bgsin}(x) \cdot \frac{1}{2\sqrt{1-x^2}} \cdot (-2x) \\ &= 1 - \frac{\text{Bgsin}(x) \cdot x}{\sqrt{1-x^2}} \end{aligned}$$
