Oefeningenreeks 3A nr. 9.2

$$f(x) = (x^n + x^{n-1}) \cdot (x^n - 1)$$

$$= x^{2n} - x^n + x^{2n-1} - x^{n-1}$$

$$f'(x) = 2nx^{2n-1} - nx^{n-1} + (2n-1)x^{2n-2} - (n-1)x^{n-2}$$
