$$\forall n \in \mathbb{N} : f_n : \mathbb{R} \rightarrow \mathbb{R} : x \rightarrow \begin{cases} x^n \sin \frac{1}{x} & \text{als } x \neq 0 \\ 0 & \text{als } x = 0 \end{cases}$$

bewijs dat f_3 continu differentieerbaar is en f'_3 niet differentieerbaar is in 0

$$f'_3 = \lim_{h \rightarrow 0} \frac{f(h)}{h} = \lim_{h \rightarrow 0} h^2 \sin \frac{1}{h} = 0$$

$$\forall x \neq 0 : f'_3(x) = 3x^2 \sin \frac{1}{x} - x \cos \frac{1}{x}$$

$$\lim_{h \rightarrow 0} f'_3(h) = \lim_{h \rightarrow 0} 3h^2 \sin \frac{1}{h} - h \cos \frac{1}{h} = 0$$

$$\lim_{h \rightarrow 0} f'_3(h) = f'_3(0) \Rightarrow f_3 \text{ is continu differentieerbaar}$$

$$f''_3(0) = \lim_{h \rightarrow 0} \frac{f'_3(h) - \cancel{f'_3(0)}}{h} = \lim_{h \rightarrow 0} \frac{3h^2 \sin \frac{1}{h} - \cancel{h} \cos \frac{1}{h}}{\cancel{h}}$$

$$\lim_{h \rightarrow 0} \cos \frac{1}{h} \text{ gaat niet naar } 0 \text{ dus } f'_3 \text{ is niet differentieerbaar in } 0$$
