$$f(x) = \frac{1}{3x+2}$$

1. VA:

$$3x+2=0$$

$$x = -\frac{2}{3}$$

$$\begin{cases} \lim_{x \rightarrow -\frac{2}{3}-} f(x) = -\infty \\ \lim_{x \rightarrow -\frac{2}{3}+} f(x) = +\infty \end{cases}$$

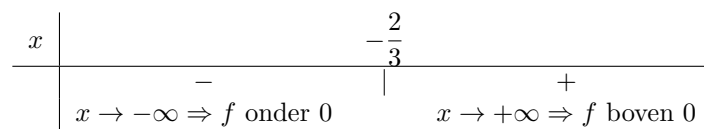

$$\Rightarrow x = -\frac{2}{3}$$

2. HA:

$$\begin{cases} \lim_{x \rightarrow +\infty} \frac{1}{3x+2} = 0 \\ \lim_{x \rightarrow -\infty} \frac{1}{3x+2} = 0 \end{cases}$$

$$\Rightarrow y = 0$$
