$$f(x) = \frac{x^2 + 1}{x - 1}$$

$$\begin{array}{r|l} \begin{array}{rrr} x^2 & +0 & +1 \\ - & x^2 & -x \\ \hline & x & +1 \\ - & x & -1 \\ \hline & 2 & \end{array} & \begin{array}{l} x - 1 \\ x + 1 \end{array} \end{array}$$

$$f(x) - A = \frac{2}{x - 1}$$

$$\frac{x}{f(x) - A} \quad \left| \begin{array}{c} 1 \\ - \\ + \end{array} \right.$$

Conclusie:

$$x \rightarrow +\infty : f > A$$

$$x \rightarrow -\infty : f < A$$
