$$\begin{aligned} & \int \left(x^2 + \cosh x + \frac{1}{\cos^2 x} \right) dx \\ &= \int x^2 dx + \int \cosh x dx + \int \frac{1}{\cos^2 x} dx \\ &= \frac{x^3}{3} + \sinh x + \tan x + c \text{ met } c \in \mathbb{R} \end{aligned}$$
