$$\begin{aligned} & \int \frac{x+1}{x-1} dx \\ &= \int \frac{x-1+2}{x-1} dx \\ &= \int \frac{x-1}{x-1} dx + \int \frac{2}{x-1} dx \\ &= \int dx + 2 \int \frac{dx}{x-1} \end{aligned}$$

Stel $t = x - 1 \Rightarrow dt = dx$

$$\begin{aligned} &= \int dx + 2 \int \frac{dt}{t} \\ &= x + 2 \ln |t| + c \\ &= x + 2 \ln |x - 1| + c \end{aligned}$$
