$$\int (5x + 7)^{-3} dx$$

Stel  $t = 5x + 7$ , dan is  $dt = 5dx \Leftrightarrow dx = \frac{1}{5}dt$

$$= \frac{1}{5} \int t^{-3} dt$$

$$= \frac{1}{5} \left( \frac{t^{-2}}{-2} \right) + c = \frac{1}{5} \cdot \left( \frac{1}{-2t^2} \right) + c$$

$$= \frac{-1}{10(5x + 7)^2} + c$$
