$$\int e^x(1+e^x)^{-2}dx$$

$$u = 1 + e^x \Rightarrow du = e^x dx$$

$$\Rightarrow \int e^x(1+e^x)^{-2}dx \Rightarrow \int u^{-2}du$$

$$\Rightarrow \int u^{-2}du = \frac{u^{-1}}{-1} = -u^{-1}$$

$$\Rightarrow -u^{-1} = \frac{1}{u} \Rightarrow -\frac{1}{1+e^x} + C$$
