$$\begin{aligned} & \int \frac{\sqrt{3x}}{5x} dx \\ &= \frac{\sqrt{3}}{5} \int \frac{\sqrt{x}}{x} dx \\ &= \frac{\sqrt{3}}{5} \int x^{-\frac{1}{2}} dx \\ &= \frac{\sqrt{3}}{5} x^{\frac{1}{2} + \frac{1}{2}} + c \\ &= \frac{2\sqrt{3x}}{5} + c \end{aligned}$$
