$$\begin{aligned}\int \frac{dx}{\sqrt{1-4x^2}} &= \int \frac{dx}{2\sqrt{\frac{1}{4}-x^2}} = \frac{1}{2} \int \frac{dx}{\sqrt{\left(\frac{1}{2}\right)^2-x^2}} \\ &= \frac{1}{2} \operatorname{Bgsin} 2x + C = \frac{\operatorname{Bgsin} 2x}{2} + C\end{aligned}$$
