$$\text{Opgave: } \int \frac{dx}{3 + \cos x}$$

$$t = \tan \frac{x}{2}$$

$$dx = \frac{2}{1 + t^2} dt$$

$$= \int \frac{2dt}{2t^2 + 4}$$

$$= \int \frac{dt}{t^2 + \sqrt{2}^2}$$

$$= \frac{\sqrt{2}}{2} \text{Bgtan} \frac{\tan \frac{x}{2}}{\sqrt{2}} + C$$
