$$\begin{aligned}
 & \int_{-1}^2 (x \cdot \lfloor x \rfloor) dx \\
 &= \int_{-1}^0 (x \cdot \lfloor x \rfloor) dx + \int_0^1 (x \cdot \lfloor x \rfloor) dx + \int_1^2 (x \cdot \lfloor x \rfloor) dx \\
 &= \int_{-1}^0 (x \cdot (-1)) dx + \int_0^1 (x \cdot 0) dx + \int_1^2 (x \cdot 1) dx \\
 &= - \int_{-1}^0 x dx + \int_1^2 x dx \\
 &= - \left[\frac{x^2}{2} \right]_{-1}^0 + \left[\frac{x^2}{2} \right]_1^2 \\
 &= - \left[0 - \frac{1}{2} \right] + \left[2 - \frac{1}{2} \right] \\
 &= \frac{1}{2} + \frac{3}{2} \\
 &= 2
 \end{aligned}$$
