$$y^2 = 6x \text{ en } x^2 = 6y$$

snijpunten

$$\sqrt{6x} = \frac{x^2}{6} \Leftrightarrow 6x = \frac{x^4}{36} \Leftrightarrow 216x = x^4 \Leftrightarrow x(x^3 - 216) \Leftrightarrow x = 0 \vee x = 6$$

$$\begin{aligned} & \int_0^6 \left(\sqrt{6x} - \frac{x^2}{6} \right) dx \\ &= \int_0^6 \left(\sqrt{6} \sqrt{x} \right) dx - \int_0^6 \frac{x^2}{6} dx \\ & \left[\frac{2}{3} \sqrt{6} x^{\frac{3}{2}} \right]_0^6 - \left[\frac{x^3}{18} \right]_0^6 \\ &= (24 - 0) - (12 - 0) = 12 \end{aligned}$$
