$$\begin{aligned} & \frac{8+i}{i+4} \\ &= \frac{8+i}{4+i} \\ &= \frac{(8+i) \cdot (4+i)}{4^2 - i^2} \\ &= \frac{(32+1) + (-8+4) \cdot i}{16 - (-1)} \\ &= \frac{(33-4i)}{17} \end{aligned}$$
