Oefeningenreeks 1B nr. 17.17

$$\begin{aligned} & (-3 - 2i)^3 \\ &= (-3 - 2i)(-3 - 2i)(-3 - 2i) \\ &= (9 + 12i + 4i^2)(-3 - 2i) \\ &= (5 + 12i)(-3 - 2i) \\ &= -15 - 10i - 36i - 24i^2 \\ &= 9 - 46i \end{aligned}$$
