$$(4 + 3i)^2$$

Uitwerking:

$$(4 + 3i)^2 = 4^2 + 2 \cdot 4 \cdot 3i + (3i)^2$$

$$= 16 + 24i + 9i^2$$

$$= 16 + 24i + 9(-1) \quad (\text{omdat } i^2 = -1)$$

$$= 16 + 24i - 9$$

$$= 7 + 24i$$

Dus de oplossing is:

$$\boxed{7 + 24i}$$
