$$a(z - i) + b(z + 2i) = 3z - i$$

$$\Rightarrow az - ai + bz + 2bi = 3z - i$$

$$\Rightarrow \begin{cases} az + bz &= 3z \\ -ai + 2bi &= -i \end{cases}$$

$$\Rightarrow \begin{cases} a + b &= 3 \\ -a + 2b &= -1 \end{cases}$$

$$\Rightarrow \begin{cases} a &= 3 - b \\ -3 + 3b &= -1 \end{cases}$$

$$\Rightarrow \begin{cases} a &= 3 - b \\ 3b &= 2 \end{cases}$$

$$\Rightarrow \begin{cases} a &= \frac{7}{3} \\ b &= \frac{2}{3} \end{cases}$$
