$$r = 4 + 2 \cos(\theta)$$

1. $\text{dom } r = \mathbb{R}$ en $p = 2\pi \Rightarrow$ beperkt domein $[0, 2\pi]$
2. $r = 0 \Leftrightarrow -2 = \cos(\theta) \Rightarrow$ bestaat niet, geen nulpunten.
3. $r' = 0 \Leftrightarrow -2 \sin(\theta) = 0 \Leftrightarrow \sin(\theta) = 0$

$$\Leftrightarrow \theta = k\pi \Rightarrow \{0, \pi, 2\pi\}$$

θ	0		π		2π
r	+	+	+	+	+
r'	0	-	0	+	0
r	$M(6)$	$\nearrow$	$m(2)$	$\searrow$	$M(6)$
