$$\int \frac{1}{x} \ln^2 x dx = \int \frac{\ln^2 x}{x} dx$$

$$\text{Stel } t = \ln x \Rightarrow dt = \frac{1}{x} dx$$

$$\Rightarrow \int t^2 dt$$

$$= \frac{t^3}{3} + C$$

$$= \frac{\ln^3 x}{3} + C$$
