$$\text{Opgave: } \int x\sqrt{x^2+1}dx$$

$$t = x^2 + 1$$

$$\frac{dt}{2x} = dx$$

$$= \int \sqrt{t} \frac{dt}{2}$$

$$= \frac{t^{\frac{3}{2}}}{\frac{3}{2}} + C$$

$$= \frac{(x^2+1)\sqrt{x^2+1}}{3} + C$$
