Bereken de volgende onbepaalde integraal $\int \frac{x+4}{x^2-x+1} dx$

$$= \int \frac{\frac{1}{2}(2x-1) + \frac{9}{2}}{x^2-x+1} dx$$

$$= \frac{1}{2} \int \frac{2x-1}{x^2-x+1} dx + \frac{9}{2} \int \frac{dx}{x^2-x+1}$$

$$u = x^2 - x + 1, du = 2x - 1 dx, v = x - \frac{1}{2}, dv = dx$$

$$= \frac{1}{2} \int \frac{du}{u} + \frac{9}{2} \int \frac{dv}{v^2 + \frac{3}{4}}$$

$$t = \frac{2v}{\sqrt{3}}, dt = \frac{2dv}{\sqrt{3}}$$

$$= \frac{1}{2} \ln |u| + \frac{9}{2} \cdot \frac{\sqrt{3}}{2} \int \frac{dt}{\left(\frac{\sqrt{3}t}{2}\right)^2 + \frac{3}{4}}$$

$$= \frac{1}{2} \ln |u| + \frac{9\sqrt{3}}{4} \int \frac{dt}{\frac{3}{4}(t^2 + 1)}$$

$$= \frac{1}{2} \ln |u| + \frac{9\sqrt{3}}{4} \cdot \frac{4}{3} \int \frac{dt}{t^2 + 1}$$

$$= \frac{1}{2} \ln |u| + 3\sqrt{3} \operatorname{Bgtan} t + C$$

$$= \frac{1}{2} \ln |x^2 - x + 1| + 3\sqrt{3} \operatorname{Bgtan} \left(\frac{2x-1}{\sqrt{3}} \right) + C$$
