Oefeningenreeks 4A nr. 38.8

$$\begin{aligned}\int \frac{9x^3 - 21x^2 + 17x}{9x^2 - 12x + 5} dx &= \int \left(x - 1 + \frac{5}{9x^2 - 12x + 5} \right) dx \\&= \int x dx - \int dx + \frac{5}{3} \int \frac{1}{(3x - 2)^2 + 1} d(3x - 2) \\&= \frac{x^2}{2} - x + \frac{5}{3} \operatorname{Bgtan}(3x - 2) + c\end{aligned}$$
