Oefeningenreeks 4A nr. 56.2

$$\begin{aligned} & \int \sqrt{1 + \cos(2x)} dx \\ &= \int \sqrt{1 + 1 - 2 \sin^2 x} dx \\ &= \int \left(\sqrt{2} \sqrt{1 - \sin^2 x} \right) dx \\ &= \pm \sqrt{2} \int \sqrt{\cos^2 x} dx \\ &= \pm \sqrt{2} \sin x + C \end{aligned}$$
