Oefeningenreeks 4A nr. 62.5

$$\begin{aligned}\int \frac{1-x}{\sqrt{1-x^2}} dx &\stackrel{x=\sin t}{=} \int \frac{1-\sin t}{\sqrt{1-\sin^2 t}} \cos t dt = \int \frac{1-\sin t}{\sqrt{\cos^2 t}} \cos t dt \\&= \int 1 - \sin t dt = \int dt - \int \sin t dt = t + \cos t + c \\&\stackrel{t=\arcsin x}{=} \arcsin x + \sqrt{1-x^2} + c\end{aligned}$$
