$$\begin{aligned} & \int \cos^2\left(\frac{x}{2}\right) dx \\ & t = \frac{x}{2} \rightarrow 2dt = dx \\ & = 2 \int \frac{1 + \cos(2t)}{2} dt \\ & = t + \frac{\sin(2t)}{2} + C \\ & = \frac{x + \sin(x)}{2} + C \end{aligned}$$
