Oefeningenreeks 5A nr. 6.12

$$\int_0^{\sqrt[4]{3}} \frac{2x}{1+x^4} dx$$
$$\text{O.I.} = \int \frac{1}{1+x^4} d(x^2) = \text{Bgtan}(x^2) + c$$
$$\Rightarrow \text{B.I.} = [\text{Bgtan}(x^2)]_0^{\sqrt[4]{3}} = \frac{\pi}{3} - 0 = \frac{\pi}{3}$$
