$$x(t) = t^2$$

$$y(t) = 4t - t^3$$

$$\begin{aligned} V &= \pi \int_0^2 (16t^2 - 8t^4 + t^6) 2t dt \\ &= \pi \int_0^2 (32t^3 - 16t^5 + 2t^7) dt \\ &= \left[8t^4 - \frac{16}{6}t^6 + \frac{1}{4}t^8 \right]_0^2 = \pi \frac{64}{3} \end{aligned}$$
