Oefeningenreeks 6B nr. 1.11

s_{20} van $(17, 25, 33, \dots)$

17 25 33

= RR verschil = 8

$x_n = x_1 + (n - 1)d$

$x_{20} = 17 + (20 - 1) \cdot 8$

$x_{20} = 17 + 152 = 169$

$$s_n = \frac{x_1 + x_n}{2} \cdot n$$
$$= \frac{17 + 169}{2} \cdot 20 = 1860$$
