Oefeningenreeks 1B nr. 20.2

$$\begin{aligned} & 1 + 2i + (2i)^{-1} \\ &= \frac{2i + 4i^2 + 1}{2i} \\ &= \frac{2i - 4 + 1}{2i} \\ &= \frac{2i - 3}{2i} \\ &= 1 - \frac{3}{2i} \\ &= 1 - \frac{3i}{2i^2} \\ &= 1 + \frac{3i}{2} \end{aligned}$$
