$$\frac{1}{2} + i\frac{\sqrt{3}}{2}$$

$$\begin{aligned}\text{modulus} &= \sqrt{\left(\frac{1}{2}\right)^2 + \left(\frac{\sqrt{3}}{2}\right)^2} \\ &= \sqrt{\frac{1}{4} + \frac{3}{4}} \\ &= 1\end{aligned}$$

$$\begin{aligned}\text{argument} &= \text{Bgtan}\left(\frac{\frac{\sqrt{3}}{2}}{\frac{1}{2}}\right) \\ &= \text{Bgtan}(\sqrt{3})\end{aligned}$$

$$\text{goniometrische vorm} = \text{cis}\left(\frac{\pi}{3}\right)$$
