Oefeningenreeks 1C nr. 12.6

$$\frac{-1}{2+2i}$$

teller:

$$\text{modulus} = 1$$

$$\text{argument} = 1$$

noemer:

$$\text{modulus} = \sqrt{2^2 + 2^2}$$

$$= \sqrt{8} = 2\sqrt{2}$$

$$\text{argument} = \text{Bgtan}\left(\frac{2}{2}\right)$$

$$= \frac{\pi}{4}$$

geheel:

$$\text{modulus} = \frac{1}{2\sqrt{2}} = \frac{\sqrt{2}}{4}$$

$$\text{argument} = \pi - \frac{\pi}{4} = \frac{3\pi}{4}$$

$$\text{goniometrische vorm} = \frac{\sqrt{2}}{4} \text{cis}\left(\frac{3\pi}{4}\right)$$
