$$\begin{aligned}
 & 2 \operatorname{Bgtan} \frac{1}{2} - \operatorname{Bgtan} \frac{1}{7} \\
 &= \operatorname{Bgtan} \left( \frac{2 \cdot \frac{1}{2}}{1 - \left(\frac{1}{2}\right)^2} \right) - \operatorname{Bgtan} \frac{1}{7} \\
 &= \operatorname{Bgtan} \left( \frac{4}{3} \right) - \operatorname{Bgtan} \left( \frac{1}{7} \right) \\
 &= \operatorname{Bgtan} \left( \frac{\frac{4}{3} - \frac{1}{7}}{1 + \frac{4}{3} \cdot \frac{1}{7}} \right) \\
 &= \operatorname{Bgtan} \left( \frac{\frac{25}{21}}{\frac{21}{21}} \right) \\
 &= \operatorname{Bgtan}(1) \\
 &= \frac{\pi}{4}
 \end{aligned}$$
