$$f(x) = \frac{x}{2x+1}$$

$$\lim_{x \rightarrow 5} f(x) = \frac{5}{10+1} = \frac{5}{11}$$

$$\lim_{x \rightarrow \frac{-1}{2}} f(x) = \frac{\frac{-1}{2}}{2\left(\frac{-1}{2}\right) + 1} = \frac{\frac{-1}{2}}{0}$$

$$\Rightarrow \lim_{x \rightarrow \frac{-1}{2}-} f(x) = +\infty \text{ en } \lim_{x \rightarrow \frac{-1}{2}+} f(x) = -\infty$$
