$$\begin{aligned} \left\{ \begin{array}{l} \ln x = u \\ \frac{dx}{x^3} = dv \end{array} \right. &\Rightarrow \left\{ \begin{array}{l} \frac{dx}{x} = du \\ -\frac{1}{2x^2} = v \end{array} \right. \\ &= -\frac{\ln(x)}{2x^2} - \int \frac{dx}{-2x^3} \\ &= -\frac{\ln(x)}{2x^2} + \frac{1}{4x^2} + C \end{aligned}$$
