$$\int \frac{e^x dx}{\sqrt{1 - e^{2x}}} = \int \frac{e^x dx}{\sqrt{1 - (e^x)^2}}$$

$$u = e^x \Rightarrow du = e^x dx$$

$$\begin{aligned} \int \frac{e^x dx}{\sqrt{1 - e^{2x}}} &= \int \frac{1}{\sqrt{1 - u^2}} du \\ &= \text{Bgsin}(u) + c = \text{Bgsin}(e^x) + c \end{aligned}$$
